

Tragedy counts many victims. Including the unfortunate architect who ignores acoustical engineering.

Faulkner's classic Shakespeare reference serves up an apt warning for architects: Ignore the twin evils of noise and vibration and risk tragic consequences.

The last thing you want to hear is bad news about acoustical design – or the lack thereof. From mechanical hum to environmental noise, the pitfalls are lurking. Whether you need to ensure vibration-free lab settings or

provide workspace speech privacy, Phoenix Noise & Vibration can help. With staff board-certified in noise control engineering, we offer solutions designed on the front end versus trouble-shooting on the back end. Or worse. (You sure won't like the sound of *that*.)

Make sure your next project has a classic ending. With acoustical engineering by Phoenix, it's bound to resonate success.

Acoustical Engineering Solutions.
